Cover image: Coquelicot, a geegeez.co.uk syndicate horse ridden by Rex Dingle and trained by Anthony Honeyball (sponsored by geegeez.co.uk), wins the Listed EBF Mares’ Final National Hunt Flat race at Kempton

Introduction

First of all, congratulations and thank you for downloading Trainer Track Stats NH 2024/25, a leading statistical analysis of racehorse trainer patterns. Over the past five seasons (and a bit*), the trainers in this guide have all earned their place by consistently leading their horses into the winners' enclosure. But the key to this guide is that many of the trainers have a record that is negative overall. That is, if you'd simply bet all of their horses at the track, you'd have made a loss.

However, by carefully selecting specific types of race in which the trainer excels, Trainer Track Stats NH 2024/25 (TTS) provides a unique insight that is not available anywhere else. This further breakdown pinpoints with absolute precision the trainer specialities that you need to focus on.

By only betting horses at 10/1 or shorter, TTS followers do miss the occasional big-priced winner.

But when putting this guide together, I decided that consistency and shorter losing streaks were the best approach, and that's been borne out for our followers over almost 20 years since the very first edition of TTS was published in 2006.

This year, for the second time, I've included a handful of high-performing trainers at Irish tracks. I hope they'll add some colour for those who bet mainly or exclusively on Irish racing.

Please do note that due to the statistical nature of this information, losing runs can (and will) occur. I recommend a betting bank to begin with of **at least** 50 points. That is, if you normally bet £5, then a bank of £250 should be used. If you normally bet, £20, then £1000 bank is recommended, and so on.

Win profit is quoted to a notional 1 unit stake at SP while each way profit (EW PL) is quoted as a 1 point win and place unit stake (i.e. 2 units staked). Where the EW PL figure is lower than the Win PL figure it means that that trainer/track combination produces a loss on the place part of the each way bet.

One more important point: even by horseracing betting sample size standards, some of these are on the small side. That means there is at least a fair chance the statistics are coincidental, though I've used some judgement with regards my overall understanding of the trainers in question and their reliability going forwards. As always, caveat emptor: buyer beware.

In the following pages, you'll find a short section on how to use TTS, which I hope is straightforward. If you have any questions or comments on anything you see or read here, do contact me at support@summumbonum.co.uk

Congratulations again on securing your copy of TTS, and stay lucky!

User's Guide

In putting this guide together, I have tried to make things as easy as possible. However, there are one or two terms which newcomers to jump racing may not understand, and so here is a glossary of terms and their meanings.

Term	Meaning
All	All runners (10/1 or shorter) for this trainer at this track
Chases	The larger of the obstacles in NH racing, usually for more mature horses.
NHF	A beginner race for NH horses, National Hunt Flat races involve racing without obstacles.
Handicap (or Hcap)	A handicap is a race where horses carry weight according to their ability, such that each has a theoretically equal chance of winning.
Hurdles	Hurdles are the smaller of the two types of obstacles which NH racing features.
3-7yo	'Year old', e.g. 3-7yo refers to horses aged between 3 and 7
Colts & Geldings	Male horses
2m4f+	Races over two and a half miles (2m4f) or more

To find the TTS horses, simply [check here for the relevant trainers](#) and race types (you can click the Trainer and Course headings to sort by those) and, if there's a qualifier at 10/1 or shorter, it's a bet (potentially, that's up to you, of course). It's as easy as that. And this year, I've included all twelve months of the year, so summer jumps fans rejoice!

A word on ★'s

★'s are awarded to any trainer who has achieved one or more of the following over the last five and a bit seasons*, with horses sent off at 10/1 or shorter:

- 15 or more winners at the track
- Strike Rate of 40% or more
- A profit of 25 units or more to a 1 unit stake
- A profit of 1.25 units per runner to a 1 unit stake

The more ★'s, the higher the confidence factor associated with that trainer / track combination. The main list – the A Team if you like – only comprises of trainers with two to four stars. In fact, there are no four star trainers this year: that's how hard it is to achieve!

**The research period for the information contained in this guide was 1st May 2019 to 10th November 2024)*

NEW: Green Scale Formatting

There are no poor performing trainers in this guide, but some have fared better than others in particular elements of their statistical profile. In recognition of this, we've included a new 'green scale'. It's quite simple: a dark green background highlights exceptional performance in a certain component, while a whitish background signifies merely 'well above average' performance.

33.02%	54.45	51.37%	61	57.55
26.09%	10.13	44.04%	11	47.83
30.43%	14.75	64.13%	14	60.87

About A/E

The information in this guide includes references to A/E and IV. Whilst you will lose nothing by not taking a moment to understand these statistical measures, you will certainly gain something if you do!

Important Note!

Before I go on, let me be clear that **you absolutely do NOT need to understand how the numbers are arrived at**. I am adding this info for geeks (like me) and the generally inquisitive.

All you need to know is that better than 1.00 is good, and worse than 1.00 is not good (for backers); and that the further away from 1.00 the better/worse the stat may be.

Actual vs Expected (A/E)

A/E, or the ratio of Actual versus Expected, attempts to establish the value proposition (*profitability in simple terms*) of a statistic. A number above 1 suggests that the angle has a positive profit expectation. That is, it should be worth following.

The 'actual' and 'expected' in A/E are the number of winners.

The actual number of winners is just that. For instance, if Nicky Henderson has had 40 winners from 113 runners, the actual number of winners is 40.

But how do we calculate the 'expected' number of winners? We use a simple formula based on the starting price (you could just as easily use Betfair Starting Price or even tote return if you were sufficiently minded - we've used SP), thus:

Actual number of Henderson winners / Sum of ALL Henderson runners' SP's (in percentage terms)

Which we know at this stage to be 40 / Sum of ALL Henderson runners' SP's (in percentage terms)

To establish a runner's SP in percentage terms, we do the sum $1/(SP + 1)$.

So 4/1 SP would be $1/(4 + 1)$, or 1/5, which is 0.20.

1/4 SP would be $1/(0.25 + 1)$, or 1/1.25, which is 0.8.

And so on...

The sum of Henderson's 113 runners' starting prices in the last five years, calculated in the above fashion, is 32.078.

His A/E then is $40 / 32.078$ which is 1.247, or 1.25 rounded.

We can then say that Nicky Henderson's horses in this example have performed 25% above market expectation in the last five years. Based on a reasonable sample size of 113 runners (all sample sizes for these reports are unacceptably small for categorical pronouncements, but in many cases are perfectly sufficient for wagering chances to be taken), we can say that in general terms his horses look worth following.

Disclaimer

We recognise that gambling can become an addiction that can cause great harm if not controlled. Despite the excellent historical track records of our trainers, we respectfully remind you that you should only ever bet with an amount of money that you can afford to lose.

For help with regard to a gambling problem, or more information on the subject, please visit:

<https://www.gamcare.org.uk>

Trainer Track Stats 2024/25

The trainers below all have excellent records in the noted conditions at the respective tracks. I have highlighted by use of the 'greenness' scale those with the strongest performance: these are the pick of the pile as outlined in the User's Guide section above, often faring well but without collecting a coveted star for a particular criterion.

Appendix 1: The Data

The trainer/track combinations in the preceding pages are the 80 best from a starting list of more than 330 wannabe combos.

Focusing only on the two- and three-star trainers, there are a total of 27 combinations. These trainers, if backed at the selected tracks and under the specified criteria, produced a starting price profit of £8,235.70 to £10 stakes between May 1st 2019 and November 10th 2024.

The total theoretical SP profit from backing all qualifying trainer/track combinations in the five-year research period (i.e. including the one- and zero-star combo's) was £17,041.60 for £10 stakes.

WARNING: Now, please be realistic. Some of the sample sizes are extremely small even by racehorse trainer research standards and, as such, caution is advised. It is unrealistic to expect a repeat of the historical performance; even if these trainers continue to win at a similar rate – which is perfectly plausible but far from guaranteed – the odds on their qualifying runners can be expected to diminish over time as the market becomes more aware.

At the end of the day, ***it is not for me to advise readers on how to deploy the information in this guide***. That said, I would expect this cohort's qualifiers to perform very well in the 2024/25 season and to stand a solid chance of making a fair profit as a team.

All the more so, perhaps, at Betfair SP. Again, ***please keep in mind that these are historical figures and I make no promise or guarantee as to their future repeatability***

Appendix 2 A: 'The 2- and 3- Star Team'

Looking in more depth at 'The A Team', those trainers with two or three stars (there were no four star trainers this year) at their tracks, the overall figures are as follows:

2 to 4 Star	
Bets	658
Wins	297
Places	423
Win %	45.14%
EW %	64.29%
Win PL	793.06
EW PL	777.08
Win ROI	120.53%

45% is a sensational hit rate, and frankly I don't expect that it will be maintained. Rather, I estimate that 20-25% is a better expectation. Likewise, the 64% each way strike rate should probably be rounded down to circa 40% to 45%. Nevertheless, those numbers should hopefully ensure that losing runs are minimised.

In the same vein, a return on investment of 120% should not be expected to be maintained, and here it is more difficult to ascertain what the likely ROI might be, given the combination of a degree of 'educated back-fitting' in the research, small sample sizes, and increasing market awareness.

What I am confident about is that all of these trainers' runners should be afforded close scrutiny if you're considering a bet in a race where they line up. And that 'marking up' approach may be a solid one in the context of overall form study. Of course, if you simply want to bet the qualifiers, you do you!

Appendix 2 B: 'The Full Squad'

The full squad, which includes all combinations regardless of number of stars, boasts a historical win strike rate of 41%, and an ROI of almost 90%.

Again, by no manner of means do I expect a replication of those figures; but equally, it will be disappointing if the collective return fails to pay for all the losers and leave some jam on the bread.

Naturally, early best odds guaranteed prices or Betfair SP will beat SP returns. **Shop around** is perhaps the best advice I can offer in this entire guide.

Overall	
Bets	1895
Wins	786
Places	1158
Win %	41.48%
EW %	61.11%
Win PL	1673.65
EW PL	1558.04
Win ROI	88.32%

Appendix 4: How to find qualifiers

Identifying qualifiers is a simple process, as follows:

1. Check the racecard of your choice for today's meetings. Weirdly, we suggest [geegeez.co.uk](https://www.geegeez.co.uk) 😊

Ayr	Heavy ⌵	12:30	13:05	13:40	14:10	14:40	15:10	15:40		
Ffos Las	Heavy ⌵	12:45	13:15	13:50	14:20	14:50	15:20	15:50		
Exeter	Good/Firm ⌵	13:30	14:00	14:30	15:00	15:30	16:00	16:30	17:00	
Thurles	Yielding ⌵	14:15	14:45	15:15	15:45	16:15	16:45	17:20		
Southwell	Std/Slow ⌵	16:10	16:40	17:10	17:40	18:15	18:45	19:15	19:45	20:15
Chelmsford	Standard ⌵	17:30	18:00	18:30	19:00	19:30	20:00	20:30		

2. Go to the A-Z page on geegeez: <https://www.geegeez.co.uk/reports/a-to-z/>

3. Look for relevant trainer / track combinations on that page, e.g. J Owen at Huntingdon:

12:20:00	Huntingdon	4		Laser Focus	J Owen	Ben Bromley	Sea The Stars	16/5
12:50:00	Huntingdon	3		Star Legend	J Owen	Sean Bowen	Galileo	85/40
12:50:00	Huntingdon	4		King Otis	J Owen	Ciaran O'Shea	Ocovango	18/1
15:10:00	Huntingdon	1		Enthused	J Owen	Mr Alex Chadwick	Zoffany	11/1

4. Ensure criteria are met:

Trainer	Course	Conditions	Runs	Wins	Places	Win %	EW %	Win PL	EW PL	ROI	A/E	IV	*
O Greenall & J Guerriero	Huntingdon	Colts & Geldings, Handicaps	25	12	23	48	92	50.43	69.99	201.72%	2.08	4.01	3
Mrs P Sly	Huntingdon	Handicaps, 7yo or younger	15	7	11	46.67	73.33	22.55	27.38	150.33%	1.74	3.76	2
J Owen	Huntingdon	All	20	7	11	35	55	13.27	1.12	66.35%	1.54	1.86	0

[In this example, we can see that J Owen at Huntingdon has 'All' for conditions, so that's easy...!]

5. Check the odds. Runners at 10/1 or shorter qualify. Here, it looks very likely that both Laser Focus and Star Legend will qualify. [*Postscript*: Laser Focus won his race at 16/5, BSP 4.32, ensuring a nice profit on the day for this angle]
6. Decide whether or not to make a bet. Your call.
7. That's it – enjoy!

Good luck!

Matt Bisogno

p.s. the alternative to the above is simply to go to this page - <https://www.geegeez.co.uk/tts-qualifiers/> - where you'll find today's and tomorrow's **potential** qualifiers listed (remember, they need to be 10/1 or shorter).
